

Harlie Collection

Designed by Jason Bird, 2013

The prismatic form of the new Harlie Collection by Australian designer Luxxbox is at once both faceted gemstone and articulated artifact. Drawing on gemology and mathematical principles with a playful reference to the geometry of the daring "Harlequin" in full costume, Harlie holds court with a killer design edge.

- Lightweight FRP fiberglass and GFRC are designed to be durable despite low weight - even for heavy-traffic locations
- Coordinates with our self-watering container irrigation products
- Metallic FRP finishes will naturally weather over time, like metal containers

Prismatic Only
